Install the "Smart Life" APP

1. You will find the "Smart Life" app on Apple App store, Google Play, or scan the QR code below and install it;
2. Enter the register/log-in interface. Enter your email address to register your free account and receive the verification code.

The free app "Smart Life" is compatible with mobile devices that support iOS 8.0 above, Android 4.4 above .

Connecting Your Socket with APP

A. Easy Mode [Recommended]
1. Please make sure the mini socket is connected to electricity. then open the "Smart Life" APP, tap the "ADD DEVICES" or the "+" at the upper right corner of the page and select"Electrical outlet;"
2. Please wait for the indicator to flash quickly, or long press on/off button of the device for 5 seconds until indicator light quickly flashed, the interface page already stepped into "Add Device" page as the above;
3. Make sure the indicator light is flashing rapidly and confirm it in app;
4. Choose the local WIFI and enter the correct password and confirm;
5. Wait for configuring successfully, then tap "Done".

B. AP Mode
1. Change to "AP Mode" if connecting failed in "Easy Mode". The AP Mode is at the upper right corner of the "ADD DEVICE" page;
2. Long press on/off button until the indicator light flashes slowly;
3. Make sure the indicator light is flashing slowly and confirm it in App;
4. Choose the local WIFI and enter the correct password and confirm;
5. Tap "Connect Now", choose WIFI hotspot named "SmartLife xxx", then return to the "Smart Life" application;
6. Wait for configuring successfully, then tap "Done".

Getting to Know "Smart Life" APP

A. Devices
You can add listed devices by tapping the "+" at the top right of this page.
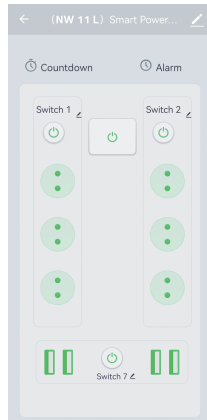

1. Switches
Switches allow you to turn on/off your device anywhere. As long as you have an internet connection you can control the device in your home. Tap the icon at the upper right of the page, you are able to modify the device name or even create a group (If you have a number of plugs and devices), which means you can turn multiple devices on or off at the same time.

2. Timer
Schedule the device "lights" to turn on when you wake up or to automatically turn on when you get home. Turn devices on and off at different time to let people know that someone is home while you are away.

3. Exit Time
You can set the devices on or off after the specific time as you want with this function.

B. Scenes

With this function, you can create your characteristic scenes as you want.

C. Profile

Profile is the entrance for the users to manage personal information, which mainly show the following information:
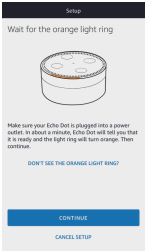

Chris's Smart Life		Profile
Home Management	Profile Photo

Smart Life has been successfully linked.

What to do next:
→ Close this window to discover smart-home devices you can control with Alexa.

## Control Smart Socket by Voice

After the previous operation, you can control the socket via Echo.

1. Discovering devices: Firstly, users need to say to Echo: "Echo [or Alexa], Discover my devices." Echo will start to finding the devices which is added in Smart Life APP, it will take about 20 seconds to show the result. Or you may click "Discover devices" in Alexa APP, it will show the devices that found successfully. Note: "Echo" is one of the wake-up name, which can be any of these three names [Settings]: Alexa/Echo/Amazon.

2. Support Skill List User can control devices by instructions like below:
Alexa, turn on [fridge socket]
Alexa, turn off [fridge socket]
Attention: The name of the device must be consistent with the addition of Smart Life App.
